Birmingham Garage & Industrial Doors Ltd

The Rowley Range by BGID

The very best of side hinged garage door systems

The Rowley Range by BGID

Side Hinged Steel Garage Doors

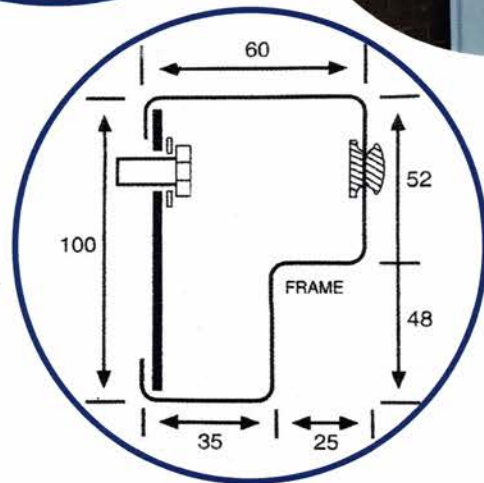

The Rowley Range, steel side hinged doors, benefits from a significantly improved form of construction. This allows BGID to provide these doors with an inner skin, which substantially improves aesthetic values, adds to panel integrity without weight penalty.

Inner Door Skin as Standard

Examples of inner door skin

BGID use a purpose made galvanized steel, industrial security quality, 2mm thick cold rolled rebated section, with mitred and internally welded corners to provide an immensley robust frame. The frame is pre-drilled, and includes, fixings for both timber and brickwork and is ready to accept BGID's unique full height continuous hinge system.

York

Rochester

Door & Furniture

The first opening, or access door, is supplied as standard with a Rim Nightlatch and 2 x keys with brass face and matching brass finger pull. The closing edge of this door is fitted with a 3mm steel 'T' section to help protect against forced entry.

The slave, or second opening leaf, is offered, as standard, with the option of either Bi-fold action or Fixed. It is then fitted with the appropriate number of 150mm **sprung action, chain operated, top bolts** and 150mm **foot operated, bottom bolts** providing security and convenience.

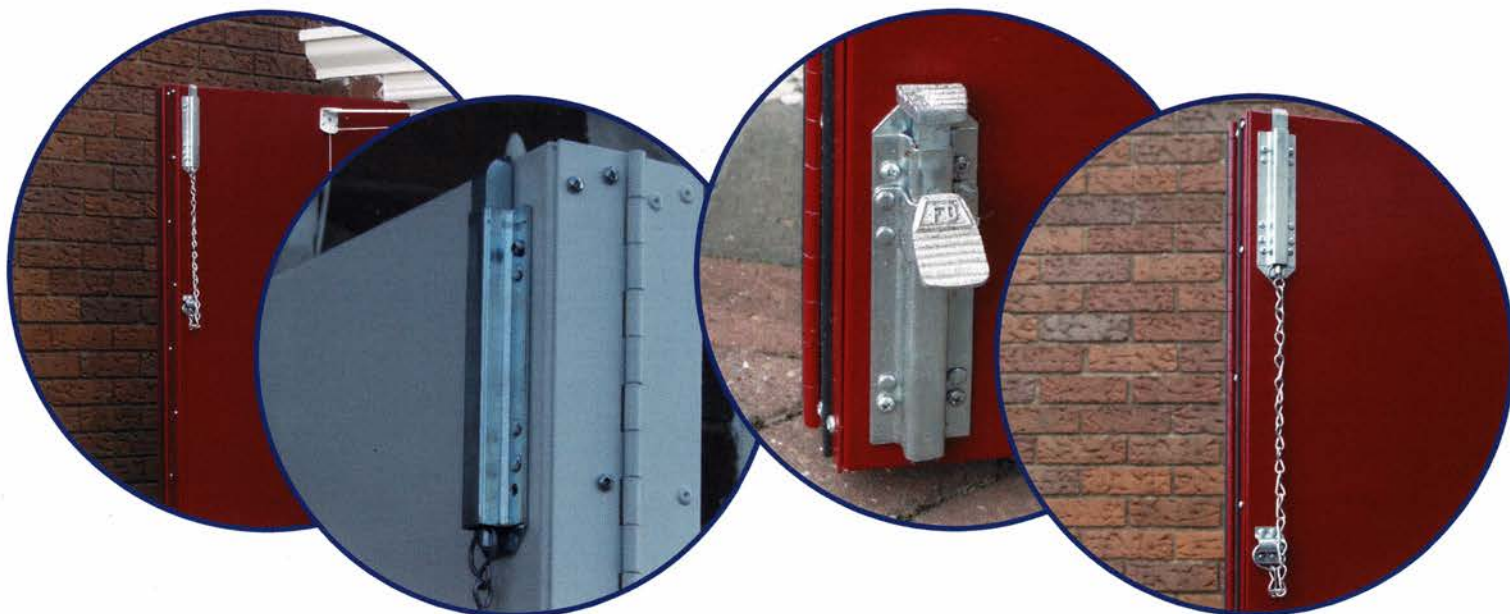

All sets of **Rowley Range** garage doors are supplied, as standard, with a pair of **overhead door stays** to conveniently and securely hold the doors open at 90°.

Powder Coating

All Rowley Range, steel side hinged garage doors and frames are supplied fully powder coat finished. The whole process taking place at BGID's own in-house continuous process powder coating plant.

White is our most popular colour, BGID also offer a further extensive range of standard colours at no additional cost. Even a white frame with a coloured door is no problem, and does not incur additional charge.

BGID recommend a textured powder coat finish, matt is also available in most colours, ask when placing your order.

flexibility is our strength

Opening Details

Size Range Chart

No standard sizes - all doors are made to measure

Two Thirds and One Third Split Brick Opening

Opening	Min	Max
Width	5' 11 1/4" (1810)	9' 1 3/4" (2786)
Height	6' 1 3/4" (1873)	7' 1 3/8" (2170)

Half and Half Split Brick Opening

Opening	Min	Max
Width	7' 9 3/4" (2380)	11' 2 1/2" (3416)
Height	6' 1 3/4" (1873)	7' 1 3/8" (2170)

The information above is based on use of BGID's own steel frame. Where a timber frame is used (not by BGID) these dimensions may alter.

BGID reserves the right to alter or amend specifications to design and manufacture without notification. All specifications are correct at time of publication.

Options

- Supplied without steel frame. If fitting to an existing or timber frame (not supplied by BGID).
- Door opening to be changed from the standard outward to inward opening.
- Door and frame set usually fit between the brickwork but can be manufactured to fit in front of or behind existing brickwork to increase maximum drive through width and height.
- Frame to include a raised or rebated threshold.
- Windows with choice of glazing styles including frosted, opaque and leading.
- Additional flashing to cover unsightly brickwork or gaps. Manufactured from galvanised steel and powder coated to match door or frame.
- Door furniture finishes in brass, chrome or stainless steel.
- Rockwool insulation for improved thermal efficiency and sound dampening.
- Seal kit; adds an additional rubber seal at the edge of the door and frame to improve weather proofing. Note: seal kit replaces foot and chain bolts with flush bolts.
- Non-standard colour selection, requires RAL number of desired colour(s).
- Mortice locks with lever handles, mortice deadlocks, additional security bolts, security escutcheon, high security euro cylinder.
- Bespoke features including letterplates and cat flaps etc.
- Single panel access doors to match garage door.
