

Insulated Side Hinged Garage Doors

Style, Quality
& Great Value

Insulated Side Hinged Garage Doors

Fort's new range of insulated side hinged garage doors is proudly designed and built at our production facility in Birmingham.

Every detail has been carefully considered and designed to make a stand-out door. We form complete door panels at our factory for perfect looks, proportions and performance, inside and out.

Dual steel skins bonded to a thermal core create 20mm thick insulated panels. Panels are mounted in specially extruded aluminium surrounds and completed with an aluminium frame. All components are precision machined for the ideal combination of high-grade engineering, great performance and stunning good looks.

UKCA marked and manufactured under our ISO 9001 quality systems, you can be sure of safety, reliability and quality.

Explore the range of elegant door designs, clever features and custom options here!

**U-Value
2.8 w/m²K**

At 2.8 (based on a 2250mm x 2040mm door), the Fort insulated door compares favourably to some types of double-glazed windows.

As standard, every door has a robust handle, latch and deadlock with an adjustable keep for precise latching and an internal thumb turn for effortless operation.

Double seals to the door leaf and frame help protect against the weather and limit dust and debris entering your garage.

A gasket between the door leaf frame and insulated panel further helps seal the door against the elements.

The colour matched hinges are adjustable in 3 directions, allowing for easy alignment of the leaves, should it be required.

Concealed shoot bolts at the top and bottom of the inactive leaf hold the door securely in place. The adjustable keeps allow for easy alignment of the leaf position for a precise fit.

For an added level of security, 3-point locking with twin hook locks, is available as an option.

Stainless steel pull handles are a sleek alternative to the standard lever handle and are supplied with a ball catch and deadlock.

Horizontal Wide Rib

Horizontal Medium Rib

Vertical Wide Rib

Vertical Medium Rib

Solid with 1500mm pull bars (1200mm also available)

Solid shown closed

Doors have a very neat, flat inner face, free from joints.

The paint finish is a highly-durable powdercoat ripple texture that gives an attractive finish with excellent resilience.

Doors are available in a classic ripple-textured finish in the solid colours shown below:
