Duragrain door design

The Duragrain surface finish, with its UV-resistant print and scratch resistant coating, ensures a beautiful door design that will stand the test of time. There are 24 different decorative printed colour finishes that are detailed and natural in their appearance.

Duragrain sectional garage doors are supplied in Grey White (RAL 9002) on the inside of the door. Side frames and fascias are delivered in Woodgrain (Traffic White RAL 9016) as standard. Lintel and frame fascias are supplied in Traffic White (RAL 9016) as standard or optionally in a colour complementing your Duragrain door.

- 1** Premium insulated 42mm thick door sections, with double-skinned steel fascia and PU-foam infill.
- 2** Surface hot galvanised steel on the interior and exterior of the door panel.
- 3** Grey White (RAL 9002) primer paint applied to door exterior and interior.
- 4** Decorative full colour finish printed onto the priming layer of the outside sections. This UV-resistant print ensure a natural, colourfast appearance that won't fade or wash out.
- 5** The final Duragrain coating is scratch-resistant and permanently protects the decorative printed colour exterior from the effects of the environment, helping to maintain the door's beautiful appearance for many years.
