

Product Help

You can set prepared helps for products by adding to the List of items found under SHOP->PRODUCT HELP

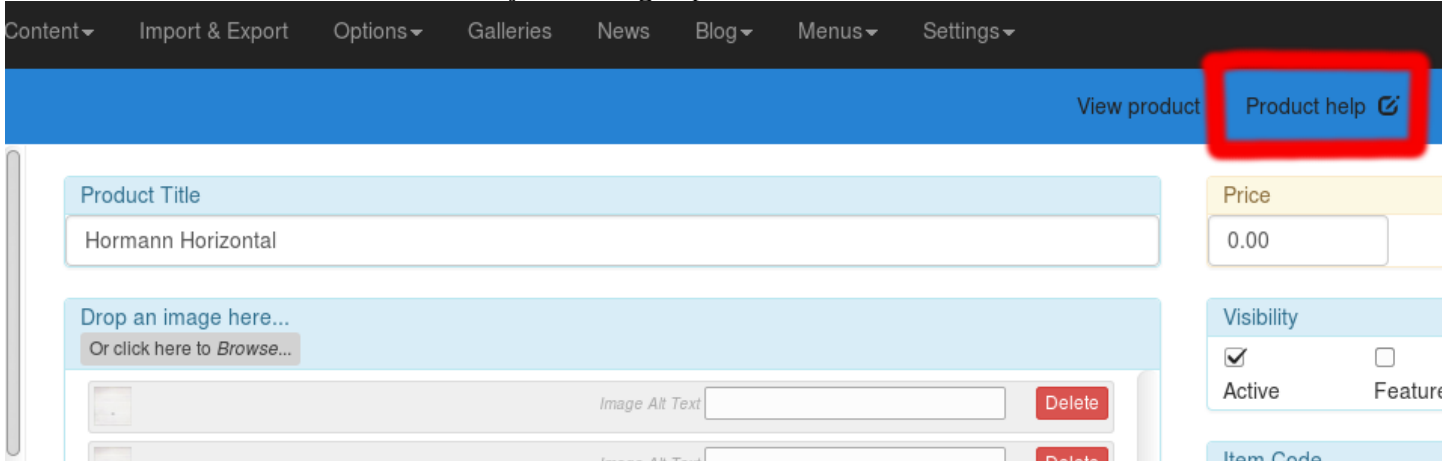

You can set the default Product help for a whole category under SHOP->CATEGORIES, Select the category you want to set Product help for, then click the PRODUCT OPTIONS HELP → button

You can see a text editor to add individual custom text, or select a prepared text from the dropdown

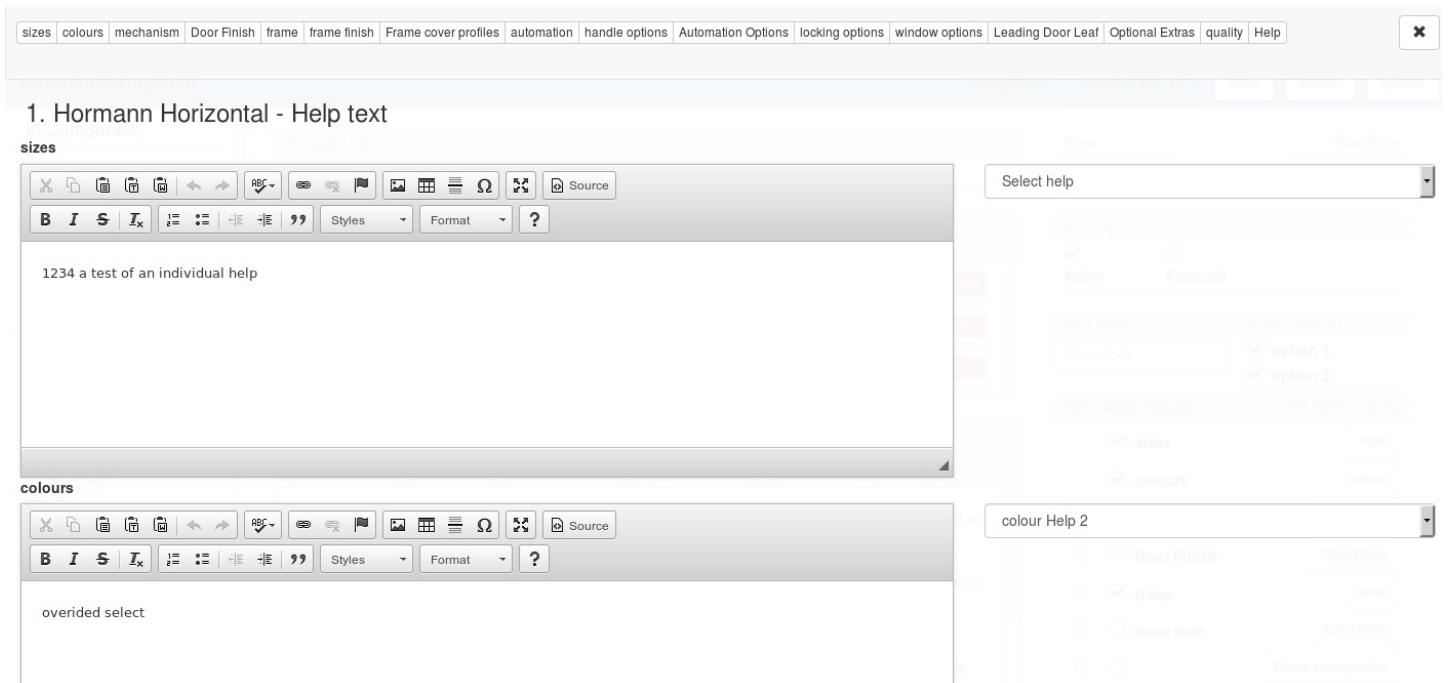

You can also set product help text individually per product.

Click the PRODUCT HELP link when you editing a product

This will add content individually per product section or from pre prepared help using the dropdown.

Order of display

When a help icon is clicked, the website will find help in this order;

1. Per product help text for the section
2. Per product selected dropdown
3. Per Category help text for the section
4. Per Category selected dropdown
